Problem Statement No.24

Course Content Simplification Agent Challenge - Many students, especially first-generation learners and those from non-Englishmedium backgrounds, struggle to understand complex academic course material. Textbooks, research papers, and lecture notes often use technical jargon or dense explanations, making it difficult for students to grasp core concepts independently. This comprehension gap leads to lower academic performance, reduced confidence, and a growing divide in learning outcomes — particularly in under-resourced or rural educational institutions. There is a pressing need for a solution that can automatically simplify educational content into clear, digestible formats suitable for a diverse student population. Technology - Use of IBM cloud lite services /IBM Granite is mandatory.
